

Single IBC spill containment bund

APPLICATION

For the storage and bunding of tanks, drums and other equipment:

- Fits one intermediate bulk container (IBC) unit; or
- One pallet of drums; or
- Compressors, generators, mobile equipment, pump sets.

FEATURES

- Materials compatible with most chemicals, acids and oils
- Heavy duty construction - stands up to the harshest environments
- Removable grated floor for ease of access and cleaning
- Manufactured and tested in Australia
- An encapsulated data plate on every bund detailing instructions for use, nett weight, maximum UDL, sump capacity and materials of construction.
